Final Plans for Senior Week, June 10-13, are Nearly Completed Now

Middlebury Campus

Annual G. M. C. Track Meet to be Held at Burlington Monday Morning at 10:30

Vol. XXIX. MIDDLEBURY COLLEGE, MIDDLEBURY, VT., MAY 25, 1932 No. 29

PANTHERS TO ENTER CONFERENCE TRACK MEET NEXT MONDAY

Three State Teams to Take Part in Annual Event at Burlington

BLUE FAVORED OVER U. V. M. AND NORWICH

Memorial Day Contest Ends Successful Season for Middlebury

The Panther trackmen invade Burlington next Monday with high hopes of capturing a state championship to climax an already successful season.

Although Norwich and Vermont are capable of furnishing the Blue and White with plenty of opposition, neither one seems to be in a position to outscore Middlebury. Whereas Norwich's great strength lies in the field events, the Panthers have not depended on these events to any extent in past meets so should not be at any disadvantage in the conference meet. U. V. M. possesses a fairly well balanced team, but should not press the Blue too closely.

Norwich opened its season against Trinity, and lost to the Connecticut team 78-48. The work of Rowley in both dashes was the highlight in the Cadets' performance. The Maroon flash did the hundred in ten seconds flat, and was clocked in 23.7 for the furlong. McGuire also turned in a double win, heaving the discus 122 feet ½ inch for a new Trinity record besides throwing the shot 40 feet, 5½ inches. Hurley's victory in the hurdles was the only other first place gained by Norwich.

Against Connecticut agricultural college, the Cadets were more fortunate and decisively defeated the Nutmeggers 87-48. The losers garnered only four first places, and were never in the hunt. Stalker was the leading scorer, but McGuire who took a first in the shot put, and then tossed the hammer a mere 136 feet 5½ inches, was the outstanding performer. This throw displaced a Norwich record of ten years duration. Rowley again flashed a ten second century, and cut his time in the

(Continued on page 6)

CHANGES ARE MADE IN COACHING STAFF

Gillson, Colgate '30, to Act as Line Coach; Nelson '32 Will Serve for Hessler

Prof. A. M. Brown, director of athletics, last Saturday announced that Robert W. Gillson, Colgate '30, had been secured as line coach for the varsity football team, and that Walter J. Nelson, Middlebury '32, would serve as coach of baseball, hockey, and freshman football.

Gillson, who succeeds Richard J. Phelan, gained his experience under coach Andy Kerr, one of the leading football mentors in the country. At Colgate the new Middlebury line director was rated as one of the best linesmen to attend the college in recent years.

The former Maroon star has been acting as assistant to Kerr at Colgate this past spring, so will have had the benefit of seeing the new rules in execution.

"Duke" Nelson, who graduates in June, has been one of the leading athletes at Middlebury ever since he was eligible for varsity competition. He will succeed Coach Hessler, who has requested a year's leave of absence. Nelson has won ten varsity letters, and has captained the hockey, and baseball teams.

Educational Film on Goethe to Be Shown at Playhouse

The official German Goethe film, prepared for the centenary of Goethe's death and lent by courtesy of the Carl Shurz memorial foundation, will be shown at the college playhouse tomorrow evening at 8:00.

This film has been prepared under the direct supervision of the German custodian of art treasures, Dr. Edwin Redslob, with the cooperation of the Goethe museums in Weimar and Frankfort and affiliated institutes. The film has been made at the very places where Goethe lived and worked, notably at Frankfort and Weimar. Brief snatches of some of Goethe's greatest works, Faust, Werther, Goetz von Berlichungen, Iphigenia, and Tasso, are interspersed.

DRAMATIC CLUB PLAY WILL BE GIVEN AGAIN

"Death Takes A Holiday" to Be Repeated in June for Commencement Program

"Death Takes a Holiday" by Alberto Cassela will be presented by the dramatic club June 10 and 11 as part of the commencement program. This play was given just before the Easter recess by the club and is repeated at this time because of the excellent success with which it met on its first presentation.

The play is considered to be one of the best psychological dramas which has been given in recent years. The cast is the same as before.

Rehearsals have been going on for the past week and the work of the actors is rapidly becoming as perfected as at the time of its former presentation. Tickets for this play will be fifty cents for ticket holders and one dollar for others.

SORORITIES VOTE TO INDEFINITELY DEFER RUSHING NEXT YEAR

Final Ballot on Abolition to Be Taken During the Spring Term

SOCIAL ACTIVITIES TO BE MORE PRACTICAL

Program to Be Planned by League Will Include Freshmen

A final ballot on the proposals which have been under consideration for the past few weeks by the sorority women was taken Monday evening, and resulted in a majority vote for deferred rushing and a new system of directing social activities in the Women's College.

Of the six propositions drawn up and presented to the women last week, three remained on the ballot after a vote taken Friday. Saturday the resolution in favor of abolition as soon as possible was dropped from the list, and Monday's ballot disclosed the final opinion of the majority.

The proposal which has been accepted by the sorority women is stated as follows: that rushing be deferred, that there be a minimum amount of social activities within the sororities, that the sorority league carry out a practical program of social activities which will include the freshman class, and that the final vote be taken any time during the second semester that the feeling on campus warrants this move.

DELTA UPSILON
1935
Frank S. Janas

Professor Cook to Speak at English Club Meeting

Prof. Reginald L. Cook will speak at the last meeting of the English club to be held at President Moody's home tomorrow evening at 7:30.

Professor Cook will give a talk on Vincent Van Gogh, a modern French painter, several of whose pictures were shown in the recent exhibit at the chateau.

The English club has had a number of speakers at its meetings during the past year, including members of the faculty and visiting lecturers. The speakers for the season's meetings have been President Moody, Miss Charlotte Moody, Prof. Lansing Hammond, Prof. V. Spencer Goodreds, Mr. William Hazlitt Upson, Dr. James L. Barton '81, and Frederick N. Zuck '32.

DUBOIS ELECTED TO EDIT 1932 HANDBOOK

Cushing Will Be Manager; Clare Walker and Mary Hall to Be the Associates

The staff of the 1932 freshman handbook has been selected by Pi Delta Epsilon and student government association. Charles N. Dubois '34 and Robert L. Cushing '34 were elected by the former society at a meeting last week. The student government association appointed Mary P. Hall '34 as associate editor and Clare Walker '34 associate business manager early this week.

Dubois is literary editor of the 1934 Kaleidoscope, assistant business manager of the CAMPUS, and a member of Kappa Delta Rho.

Cushing was chairman of the frosh frolic committee and served on the Spanish carnival committee. He is assistant advertising manager of the 1934 Kaleidoscope and president of the

FINAL PREPARATIONS FOR COMING SENIOR WEEK NEARLY MADE

Activities to Open June 10 With Presentation of Casella's Drama

CLASS DAY PROGRAM ALREADY DRAWN UP

Billy Murphy's Arcadians to Furnish Music for the Senior Ball

A. Kirkland Sloper, chairman of senior week, reports that plans for the activities are progressing well under the heads of the various committees.

"Death Takes A Holiday" will be presented at the playhouse Friday and Saturday nights, June 10 and 11.

Attractive programmes for class day have been drawn up by Lynn Callin, chairman of the committee, and are now being printed. The class day activities will be preceded by the carrying of the daisy chain by the junior women, an annual and traditional ceremony of senior week.

The commencement dinner will be held at the McCullough gymnasium Monday, June 13, at 1:00 p. m. Each senior is entitled to one ticket which can be secured at Mr. Wiley's office. Seniors are requested not to obtain tickets if they are not going to use them. Extra tickets may be procured at one dollar each.

Monday evening the senior ball will be held at the gymnasium, with music by Billy Murphy's Arcadians. This orchestra is just beginning its summer tour after a very successful season at the Arcadia ball room in New York city. It consists of twelve pieces and is considered by many to be one of the best orchestras which has played in Middlebury in recent years.

Tickets for other senior week events may be secured upon application to the alumni secretary, room 4, old chapel. The price of tickets is as follows: commencement play, $1.00; alumni and alumnae luncheon, $1.00; luncheon at Bread Loaf, $1.00; and varsity baseball game, $1.00. The latter may be purchased at the gate.

Program for 1932 Commencement

Friday, June 10

2:00 p. m.	Registration begins	Egbert Starr library
8:15 p. m.	"Death Takes A Holiday" presented by the dramatic club	Playhouse

Saturday, June 11

ALUMNI DAY

	Registration all day	Egbert Starr library
9:00 a. m.	Trustees' meeting	Treasurer's office
10:00 a. m.	Class day exercises	Campus
11:30 a. m.	Meeting of alumni council	Old chapel
12:30 p. m.	Alumni and alumnae luncheon	Battell cottage
1:30 p. m.	Meeting of the Associated Alumni	Battell cottage
1:30 p. m.	Meeting of the Alumnae association	Pearsons hall
3:00 p. m.	Baseball, St. Michael's vs. Middlebury	Porter field
4:30 p. m.	Reception	President Moody's home
6:00 p. m.	Class reunion dinners, as arranged by the secretaries.	
7:30—9:00	Concert by the college band	Campus
9:00–12:00	Alumni informal dance	McCullough gymnasium
9:15 p. m.	"Death Takes A Holiday" presented by the dramatic club	Playhouse

Sunday, June 12

10:45 a. m.	Baccalaureate service	Mead memorial chapel
1:00 p. m.	Luncheon	Bread Loaf inn
5:00 p. m.	Twilight musicale	Mead memorial chapel
7:00 p. m.	Step singing	Pearsons hall
8:00 p. m.	Fraternity reunions	At the houses

Monday, June 13

9:00 a. m.	Meeting of Phi Beta Kappa	Old chapel
10:00 a. m.	Procession leaves old chapel.	
10:30 a. m.	Commencement exercises	Congregational church
1:00 p. m.	Commencement dinner	McCullough gymnasium
9:30 p. m.	Senior ball	McCullough gymnasium

1934 KALEIDOSCOPE PLANS IN PROGRESS

Contracts Have Been Signed for Photography, Binding, and Engraving of Annual

Contracts for the photography, engraving, and printing of the 1934 Kaleidoscope have been signed, and preliminary work on the book has been started.

The White studio of New York city will again be the official photographers for the Middlebury annual. This studio is considered to be one of the best in the East, being official photographers for West Point, Annapolis, Dartmouth, Columbia, and many other large schools. The concern is also a leading company in taking publicity pictures.

For the eighth successive year, the Kaleidoscope will be engraved by the Canton Engraving company, Canton, Ohio. Originality and high quality of art work on the part of this concern will, it is hoped, aid in making a very attractive yearbook.

Baker, Jones, Hausauer Incorporated of Buffalo, N. Y., is the only new company working on the book, which they will print and bind. Included among the schools and colleges whose annuals they have produced are Fordham, West Point, Mount Holyoke, Vassar, and Cornell.

THESE EXAMINATIONS.

Finals begin on Saturday. Comprehensives have been held for the past two weeks. For many Middlebury students these days are days of reckoning. Loud are the sounds of lament and declaration that examinations are not essential and fail in their purpose. We wonder if students are not justified in their beliefs.

The procedure of the typical student at examination time is to cram his head as full of facts as possible just before the fatal hours, set some of these down on paper during the period, and then proceed to forget as rapidly as possible both the facts he has written and whatever else he might have had in his mind as a reserve. We hold that such a system is not real education. It is true that it is necessary for the instructor to test the work of the student and form a judgment as to his ability in the subject at hand. We believe that a thesis written under the careful direction of the instructor and not compounded from obscure pamphlets or dust covered volumes, as is now the case, would be the ideal method of "examination". By means of a thesis of this nature the student's knowledge of the entire field of the subject could be determined and he could also give extra time to some special phase of the study which interested him.

According to the CAMPUS questionnaire it would seem that the student body is in sympathy with comprehensives. It is the general belief that preparation for these examinations will cause the student to correlate his work during the past four years in the department of his choice. We believe that a course should be instituted by each department for the purpose of such correlation. The course might be taught during the last semester, for seniors, it being the purpose of the course not to teach new facts but to tie together material already gone over. We feel that such a system would serve to give a proper perspective to the field which has been covered, a perspective which would not be apt to be reached by the student without the aid of the instructor who has the advantage of a broader viewpoint.

May we suggest to the administration that attention be given to the matter of finals and that some system be derived which will link up the work of the student in the department of his concentration.

SAXONIAN.

The annual banquet of the *Saxonian* board last night brings to mind the fact that contrary to announcements made at the beginning of the year the promised six issues of the magazine have not been forthcoming. We wish to give consideration to the causes of this failure and possible methods of avoiding a recurrence.

Financially there have been no difficulties. We feel that criticism cannot justly be made of the conscientious work of the editor. Evidently then, the fault must be laid to the failure of undergraduates to send in contributions.

It seems that early in the year when appeals were made for contributions that the student body responded quite as well as could be expected and that much material was submitted. The greater part of it was of inferior quality, however, so but little was published. The students who had handed in their efforts without result, became discouraged, and when it was time for the next issue but few articles were forthcoming. Apparently the undergraduates had lost interest and were no longer anxious to contribute.

To discover means of improving the *Saxonian* is a problem for the *Saxonian* board. However, we would like to suggest that in the future, material which is submitted but is not of sufficient excellence for publication, be returned to its authors, and unless the work is entirely hopeless, that suggestions be made as to its betterment. We also believe that a definite system of advancement to the board, based upon some plan of tryouts with an enlarged contributing staff, would be of benefit.

Let us hope that the new board will discover means to publish a literary magazine of a quality in keeping with Middlebury's reputation as one of the foremost liberal arts colleges in the east.

Galley Grist

—by John Israel Smith

For the long months of the summer vacation, in between tennis, golf, and swimming, we recommend the following: "Dorothy Wordsworth" by Catherine Maclean.

William Wordsworth's sister, Coleridge's better angel, friend of Southey and De Quincey and a wide circle of literary folk, the self-effacing Dorothy never knew to what an extent she was the moving spirit of one of the great periods of English letters. The subject of this biography is Dorothy the woman — "a woman whose capacity for intensity of living amounted almost to genius, and who sought above all things fullness of life." The book is written out of love and understanding; its portrait of this exquisite sister and forbearing friend should hang in the small gallery of English women of letters whose "works" were their lives.

"To look upon her life," says the author, "is to gain something in knowledge of the nature of life itself, flame-like, flickering, at times seeming to be a huddle of distracted details, at times quite perverse and wasteful — and yet relentlessly compelling all things towards unity of design."

"Mozart" by Marcia Davenport.

The author's completely human picture of Wolfgang Amadeus Mozart places this book at once in the front rank of biographies. The reader traces every thread of the strange tapestry of lights and shadows of the composer's life from his early years as a "wunderkind" — he gave his first public performance on the clavier at the age of five — through his triumphant journeys to Vienna, Paris, London and Rome, the exciting and amusing scenes that accompanied the production of his great operas and symphonies, the disappointment and poverty that dogged his steps, to the pitiful pauper's funeral in Vienna, scarcely three short decades after the child prodigy had romped with the Emperor's children after playing for them in the palace.

The biography flows with the rapidity and liveliness of a novel, although historical accuracy is never sacrificed. One knows intimately every phase of Mozart's life, and the reflection of that life in his compositions. As the portrait of a genius the book compares with, and has the same charm as, Maurois' "Ariel" and Romain Rolland's "Beethoven." It is distinctly for the general reader, although musicians will find in it a brilliant new interpretation of the life, times and works of a master. During the three years in which it was written the author visited every town and city in which Mozart had lived, collecting an amazing amount of original data. Some of which is of a sensational nature — such as the Constanze Mozart-Nissen documents, which reveal Mozart's wife in a new light — and appears in this book for the first time in English.

The author has had a background of music and musical people. Her mother is Alma Gluck, the famous soprano. Her step-father is Efrem Zimbalist, the violinist. No one could better understand the musical "atmosphere" or transmit it so well to the written pages of a biography of so fascinating a character as "Mozart Magnus." The book is also noteworthy from a typographical standpoint, Thomas Cleland, noted typographer, having designed the jacket and title page and laid out the letter press.

"Worshipful Society" by John Galsworthy.

Three complete novels, first published when the rising genius of Galsworthy was recognized, but before he became internationally famous, are here brought together in one volume. They are "The Country House," "The Patrician" and "Fraternity." The stories are related only in theme — which may be described as the reaction of modern society in crises that threatened to disrupt it. In one case the theme is divorce, in another unyielding pride of family, in the third "noblesse oblige."

To a very large number of readers whose acquaintance with Galsworthy dates from "The Forsyte Saga" these novels will be a new experience. Incidentally, they are stories of life in an era that can never happen again — the orderly, mannered life of pre-war England —a society which was "worshipful" in more than the ironic sense, and which is fascinating in its contrast to that of the present day.

Shreds and Patches

—by James S. Tyler

Well, well and well! All of us who chose Middlebury with the glad reassurance that we were forsaking the congestion and crime waves of the metropolis will be disillusioned to learn that the recent cold-blooded hold-up and plunder of the dog-cart was the machination of an accomplished gang of thugs — silk masks and all. And was it ever successful? They got away with every penny of the capital on hand, amounting to some twenty-four dollars and eighty-seven cents (it must have been gangster doings, hey?) A special CAMPUS representative was sent to Atlanta to see what Mr. Capone had to reveal.

Thursday night last, just as that incredibly grand moon was poking over the top of the Green Mountains, silhouetting each pine tree along the ridge and sending all the brothers out on the front lawn turning handsprings, somebody turned on Kate Smith in a vocal chorus.

Yep, spring has hit the student body, even as far as the most sensible of us, but while moonlight walks along the several roads that lead out of town to the groves where Venus holds sway (refer you to Greek mythology 21.2), are quite the thing to do, we have a suggestion. Gaga swains should remember that bus-loads of returning atletes are not the most favorable support for such expeditions. Another case where two is company and forty is a blinkin' crowd.

Speaking of track trips another victory goes down in the books for the competent Panthers after swamping Union Saturday last. Mental picture of a large black panther putting the shot . . . .

Because the Harvard Crimson, facing the universal college student employment difficulties, suggested that all students who must earn their whole way through college be barred from entrance, Time (which only makes enough mistakes each week to fill a column of reader's letters) conducted a survey of American universities. They found that from 15 per cent to 25 per cent of all students were entirely self-supporting. At Yale last year 40 per cent earned more than $600,000 for their education -- 20 per cent this year. There are 65 per cent earning all or part expenses at University of Chicago, and college loans there were doubled this year. On the coast, 60 per cent of the men and 20 per cent of the women work at Stanford, while in the South nearly half the students are self-supporting, and things are looking up. It must make it easier at Middlebury to consider the great American brotherhood of hashslingers and dishwashers all sweating for a single sheet of sheepskin some day.

Senior dignity is no longer a myth, unless you cut chapel last Sunday. Caps and gowns lend an air of that indescribable something which makes little tots want to run and hide.

Over a month ago something momentous occurred and while we were waiting for the outcome, we kept the thing a deep secret. Hold onto your chairs, little ones — a copy of "All Passion Spent" was ordered and delivered to the department of registry. Now don't say we never told you, when Painter burns down, source undetermined.

CALENDAR

Thursday—
5:00 p. m. Organ recital by students in Mead memorial chapel.
8:00 p. m. English club meeting at the home of President and Mrs. Moody.
Goethe movie, at the playhouse.

Friday—
3:00 p. m. Tennis, U. V. M., there.

Saturday—
9:00 a. m. Final examinations begin.
7:30 p. m. Kappa Kappa Gamma formal at the inn.
Delta Upsilon formal at the DU house.
Delta Delta Delta informal at the rooms.
Beta Psi informal at the lodge.

Sunday—
7:30 p. m. Recital by music students at the studio.

Monday—
10:30 a. m. G. M. C. track meet at Burlington.
3:00 p. m. Tennis, St. Michael's at Winooski.
3:30 p. m. Baseball, Norwich, there.

Last week the CAMPUS printed an article by Professor Fife setting forth the aims of the economics department. This week articles are included by the heads of the sociology and political science departments. It is hoped that by means of these articles students will gain a better understanding of the least understood of all sciences, the social sciences.

Music Students to Present Program at Studio Sunday

The students of the music department will give a recital Sunday evening, May 29, at 7:30, in the music studio.

The program of songs and piano selections will include the following numbers: Sonata, first movement, Beethoven, piano; Jean Wiley '35. Fire Sparks, Mosgkowski, and Etude, Schutt, piano, Allan Everest; Overtones, Rasbach and Shepherd, Play a Little Air, Spicles, songs, Elizabeth Platt '35; Prelude, and Moonshine, MacDowell, songs, Lyle Glazier '33; Intrata, Bach, and Intermezzo, Brahms, piano, Julia Sitterly '33; The Little White Donkey, Ibert, and Hark, Hark the Lark, Schubert-Liszt, piano, Jean Wiley '35; Hymn to the Sun, Remsky-Karsakoff, violin, Alice Collins '33; Improvisation, MacDowell, and Grillen, Schumann, piano, Dorothy Gifford '34; Prelude, and The Girl With Flaxen Hair, Debussy, piano, Frances Bouton '35; Poor Man's Garden, Russell, song, Francis Sprague '34; Witches' Dance, MacDowell, piano, Carolyn Pike '32; and Prelude, and Tristesse de Columbine, Schutt, piano, Eleanor Orde '34.

Carol McNeely Elected New Press Club Editor

Carol H. McNeely '33 was elected editor-in-chief of the press club for next year at a meeting held yesterday. Other officers elected were Philip L. Carpenter '33, business manager, Catherine E. Petrie '34, associate editor, and Gladys E. Mountford '33, managing editor.

Miss McNeely has been a member of the press club for two years, and was business manager this year.

Mr. Carpenter was managing editor of the press club for the past year. He was also in the glee club and the choir his first two years and has been a member of the band for three years. He qualified for the dean's list his freshman year and is a member of Kappa Delta Rho.

Miss Petrie has been a tryout for the press club for the past year and was recently elected to membership in it. She is also class editor of the 1934 Kaleidoscope, and was house chairman her freshman year. She is a member of Sigma Kappa.

Miss Mountford has been a member of the press club for the last two years. She also plays in the orchestra and has directed experimental plays. She is a member of Wig and Pen and of the French club.

Photographs for Contest Due June 1

All photographs for the undergraduate contest, the conditions of which have been stated in a previous CAMPUS must be left in the office of the college editor by next Wednesday.

NOTICES

PHILOSOPHY 42

Those who wish to apply for permission to take Philosophy 42 this coming year are asked to hand their names to Dr. Harrington in writing before the end of this spring term.

The class will be limited to ten seniors or graduate students, chosen from those who apply. The ten will be those who are likely to get most out of the course. The following qualifications will be taken into account: Courses of whatever sort already taken which form some real preparation for this course; thoroughness and grasp with which those courses have been pursued; habits of study; habits of class attendance; initiative in study; general ability; and attitude toward the intellectual adventure, as far as facts on all these points can be found out. While priority of application is an advantage if candidates are of nearly equal quality, still the best ten will be chosen regardless of everything.

The list of those who have permission to take the course will be posted on the first day of registration next fall.

NOTICE FOR SENIORS

Detailed announcements will be posted on the bulletin boards soon with regard to the ticket reservations for the various events of commencement and room accomodations for the guests of members of the senior class.

SPECIAL ANNOUNCEMENTS FROM ALUMNI OFFICE

The golf links and tennis courts will be open to returning alumni.

Tickets for the following events may be had upon application to the alumni secretary, room 4, old chapel.

After 2 p. m. Friday, June 10, and throughout commencement, the secretary's office and alumni headquarters will be located in the Egbert Starr library. Owing to the usual rush at commencement, it is advisable to make reservations immediately.

Commencement play (either performance)	$1.00
Alumni and alumnae luncheon	1.00
Luncheon at Bread Loaf	1.00
Commencement dinner	1.00

Tickets for the varsity baseball game will be $1.00 and may be purchased at the gate.

The time stated in this program is eastern standard time.

Alumni — Be sure to register

OFFICIAL NOTICE

Students wishing to use typewriters at the June examinations will please make application at the registrar's office before Friday, May 27.

OFFICIAL NOTICE

At the last meeting of the faculty, changes, as noted below, were made in the regulations concerning the granting of honors. The new regulations, which were made necessary because of the institution of the comprehensive examination system, will be effective with the class of 1933. Members of next year's graduating class are urged to consult immediately with their department head if they have any intention of working for honors. Information concerning the regulations may be obtained from Professor Owen or from the head of the department from which honors are sought.

The system of honors is divided into two classes: honors and high honors, which are subject to the following regulations:

1. Honors must be sought in the department in which the candidate is concentrating, and at the end of his course his application for honors must have the unanimous recommendation of the department.

2. The candidate shall announce his attention of working for honors to the head of the department concerned at a time not later than the registration period at the beginning of the senior year. It is urgently recommended, however, that the candidate consult with the departmental head at as early a time as possible in order that the requirements for honors in the department concerned may be thoroughly understood and completely met.

3. Each candidate for honors shall be required to pass by unanimous vote of the entire department concerned a special comprehensive examination to be devised and administered by the department in which honors are sought. Each department shall issue at least one year before the date set for the special examination a statement of the material on which the examination shall be based and shall have the right to include special requirements as seem suitable, such as complementary courses in allied departments, etc.

4. In order to secure honors a student must have obtained an average rank of not less than 80% in the department in which he seeks honors; a general average of not less than 80% in his entire college course, and a grade of 85% in the special comprehensive examination. In order to secure high honors the student must obtain an average rank of not less than 90% in the department in which he seeks high honors; a general average of not less than 85% in his entire college course, and a grade of 90% in the special comprehensive examination.

5. Candidates for honors are expected to consult frequently with departmental heads concerning their progress in fulfilling requirements and in general concerning their preparation for the special comprehensive examinations.

CALENDARS ADOPTED

The revised calendars for the academic years 1932-33 and 1933-34, as issued by the committee on the calendar April 25, have now been adopted without further changes. Registration for the year 1932-33 will begin Monday, September 19.

The calendars have been posted in detail on the various bulletin boards and will be printed in the next issue of the college catalogue.

Notice

The CAMPUS announces the election of the following to its news staff: Ruth Brown '34, Josephine Knox '35, Frances Lamson '35, Arline Newcomb '35, and Jean Walker '35. These women were chosen by the editorial board at a meeting held Monday afternoon. The members of the men's college who were on the news staff were re-elected to the same positions at this time.

SOCIOLOGY IS NOW IMPORTANT AMONG MODERN SCIENCES

Professor Kingsley Offers Comment on Phases of Subject

TREATS OF HUMAN SOCIAL RELATIONS

Research Based on Science and Reason, Not Trial and Error

Sociology is a modern science. It is not a pure science, nor is it an exact science. And yet it uses the most modern methods of scientific investigation to ascertain and to arrange its data. In fact it was sociology which invented modern methods of statistics and correlative relationships in mathematics.

Sociology is the science which treats of human social relationships, of social organizations, social forces, social problems, social remedies, and social ideals.

Man, biologically, has probably changed but little during the past quarter million years. Man, certainly, has not changed biologically to any perceptible extent during the last ten thousand years, and yet he has done more for civilization during that period than he did during the million preceding years. Man's civilization is a social product.

It has taken well-nigh a million years to work the social technique and social organization we now possess. The process has been long, painful and wasteful. It has been a process of fumbling, of trial and error, of confusion, of wastefulness, but even at that the results have justified the efforts. By the slow process of trial and error man has selected many valuable cultural acquisitions. He has learned many social principles and much valuable knowledge about social relationships and social organization. He has taken note of and has preserved the experiences of the race until the past successes of mankind when assembled into social opinions, ideals, laws, languages, institutions, etc. form a most valuable whole which is called civilization.

During the last hundred years — yes, during the last fifty years society in a material sense has gained more than during much of its previous existence. And even so, probably ninety percent of our total social inheritance is the result of human experiences gained and woven into the social fabric long before the present historic era.

A child when born possesses not a civilized act or thought. To him the Oriental, Occidental or Hotentot civilization are all the same. He is neutral to all languages, social standards and ideals. He starts at zero. Unless civilization had been preserved by his elders he would grow up in a rank below the barbarian. He is immersed in social traditions and absorbs them. After years of growth and development he becomes socially adjusted, he becomes an Occidental or Oriental fully developed in all the ideas and technique of the kind of civilization he has inherited. As a rule the child takes for granted civilization as he found it. What is good enough for his fathers is good enough for him. He loves his surroundings, his newly acquired traditions, etc. as he does his life. He loves even the inefficiencies and evils of his civilization. His entire surroundings become conventionalized and standardized, even idealized. The child needs to become adjusted to his social surroundings. This is called socialization. It is education that socializes, but sad to say education does too little in this line. The child must learn to act and think in terms of civilization, not in terms of barbarism. He should be directed to think in terms of reason and not of prejudice, superstition and inefficient tradition. The child born in an iron plow age should be willing to accept the gang plow and the tractor if he finds it rational. So also should he be willing to accept a corresponding advance in social usages and technique.

It is under these conditions that a science of sociology becomes necessary. A world with a rich civilization with the experiences of man's best endeavors with marvelous thoughts and feelings as recorded in literature and art must be preserved. And yet the past must not be idealized to such an extent that efforts to improve our conditions are killed before execution. In standardizing and idealizing our civilization we must not standardize and idealize our faults, evils, and wastes. Sociology recognizes the social wealth we have inherited but it also realizes the greater tasks of the future.

Sociology realizes that although we are living in a most progressive age industrially and materially yet we are living in an age of social inefficiency, of backward technique and antiquated ideals. Society has changed little in efficiency in the past two hundred years while during the same time the world has been reborn mechanically. Each invention complicates our social structure, it makes new and more complex social adjustments. The automobile, the moving pictures, and the radio have changed the home, the community, the city and the state. They have changed laws, morals, ideals. They have changed our daily lives, our thoughts, our acts, they have disorganized and reorganized society. New social adjustments and technique are demanded. Sociology is organized to aid in such crises.

Our country in a little over two hundred years has extended from a few little local communities into a great empire of free states — each one of which is as large as some ancient empire. Little democratic localities have grown into great metropolitan centers. A people with a few vocations has expanded into a people with ten thousand vocations, a people whose rich were not far above the poor in worldly treasure has changed into a people having the greatest riches in the hands of a few while multitudes possess practically nothing. From these conditions arise great social problems. The questions of what is right and what is wrong must be readjusted; also the questions as to what is duty and what is freedom. There is always present the problem as how to allow and encourage individual inititiative while at the same time to inhibit exploitation. There arises the problem how to protect the weak with-

ALUMNI NOTES

Connecticut Alumni Hold Meeting

The annual dinner of the alumni and alumnae of the Connecticut district was held at the Hotel Barnum in Bridgeport, Saturday evening, May 21. Wilmot T. Fiske '09, acted as toastmaster, introducing as speakers: Dr. Myron R. Sanford, emeritus professor of Latin; Mrs. E. Pruda Wiley '12; Prof. D. L. Robinson '03, president of the Connecticut district, who was formerly a member of the Middlebury faculty and now a teacher in the Taft school in Watertown, Conn.; Dr. William S. Burrage, head of the Greek department; and Mr. E. J. Wiley '13, secretary of the associated alumni. Mr. Homer R. Denison ex-'14 led the singing with Mrs. Wiley at the piano. The showing of Middlebury movies was a feature of the program.

A committee was appointed to make arrangements for the next annual dinner which will probably be held in Hartford.

Capitol District Alumni Dine in Troy

The alumni and alumnae of the capitol district of New York state dined at the Hendrick-Hudson hotel in Troy, Friday evening, May 20. W. Raymond Wells '30, president of the club, presided at the dinner. Dr. Wm. S. Burrage of the college faculty was the speaker of the evening and movies of the various college events of the year, entitled Middlebury Memorabilia, which had been taken and edited by W. Storrs Lee '28, were shown by E. J. Wiley '13. Mrs. Burrage and Mrs. Wiley '12 also attended the dinner.

Alumni of California Hold Meeting

Former students of Middlebury living in the state of California held a banquet, which they called an informal get-together, on Saturday evening, May 14, at the Aileen tea room in Los Angeles. Movies of Middlebury were shown. The arrangements were made by Robert B. Brown, ex-'20 of Long Beach, California.

COLOPHON IS SHOWN IN ABERNETHY WING

Book Collector's Quarterly to Be on Display at the Library During Senior Week

There has been put on display in the Abernethy wing of the library a book collector's quarterly, the Colophon. This copy will be on exhibition throughout commencement.

The idea of such a quarterly originated in 1928, but it was a full year before plans materialized, and not until 1929 was any public announcement made. In February 1930 the first number was issued.

The cost of the first subscription incuding four numbers was ten dollars, but the second year the price was raised to fifteen dollars, and individual copies of the first four numbers are now worth ten dollars apiece.

The primary concern of the Colophon is with first editions, Americana, bibliography, and fine printing, although its appeal is to all who appreciate the beauty of books.

Students of modern American literature will be interested in such articles as: H. L. Mencken, "On Breaking into Type"; Willa Cather, "My First Novels"; E. A. Robinson, "The First Seven Years"; Frederic Melcher, "Robert Frost and His Books"; and Theodore Dreiser, "The Early Adventures of Sister Carrie".

Book illustration also receives adequate attention. E. W. Kemble tells of his experiences in illustrating "Huckleberry Finn", while another article is devoted to the artist Daumier.

Stephen Douglas, of the Lincoln-Douglas debates, was born in Brandon, Vermont, and was apprenticed as a youth to a cabinet-maker in Middlebury.

INFORMALS

Kappa Delta Rho

Kappa Delta Rho held an informal sport dance Saturday evening, May 21. Thirty couples danced to music furnished by radio and victrola. Refreshments were served.

The chaperons were Prof. and Mrs. Frank E. Howard and Miss Laila A. McNeil.

Sigma Phi Epsilon

An informal dance was given at the Sigma Phi Epsilon house Saturday evening, May 21. Twenty-five couples attended. Music was furnished by a three piece orchestra.

The chaperons were Prof. and Mrs. Harry M. Fife, and Prof. and Mrs. James S. Prentice.

Beta Kappa

Beta Kappa gave an informal dance at the house Saturday evening, May 21. Music was furnished by radio and victrola. Twenty couples attended.

The chaperons were Prof. and Mrs. Raymond L. Barney and Prof. and Mrs. Russell G. Sholes.

Ten Women are Elected A Tempo Club Members

Ten students of the women's college were unanimously elected to membership in the A Tempo club at a meeting held Friday, May 20.

Those admitted were Ruth Berry '33, Rachael Booth '33, Elizabeth Hamlin '33, Arnolda Gifford '34, Dorothy Gifford '34, Eleanor Orde '34, Matilda Romeo '34, Dorothy Smith '34, Anna Tuthill '34, and Clara White '34.

In order to become a member of this organization, a student must have fulfilled four definite requirements. She must have taken or have elected for the following year practical work in music accompanied by a theoretical course; she must play some musical instrument; she must have shown definite interest in the work of the music department and in its conecrts, and she must send in a written application for membership. In addition she must be elected by a unanimous vote of the club members.

POLITICAL SCIENCE A PRACTICAL SUBJECT

To Give an Understanding in Government and Politics is the Departmental Aim

To the Editor of the CAMPUS:

When you asked me to write a statement of "the purpose of the Political Science Department", I immediately suggested that first you get some one to answer the question, "what is the purpose of an education?" I know that educators differ widely on that question. It seems to me that knowledge and education are often confused and mistakenly considered synonymous.

Before stating the "purpose of the Political Science Department", I want to give a word of advice to the prospective student of Political Science. Read history and biography-history current, recent, and ancient.

The real sciences, like chemistry and physics, differ greatly from the so-called social sciences—a somewhat misleading term used by educators and text book writers, some of the latter being also educators. The amount of subject matter in chemistry, for instance, is increasing tremendously. The chemistry I studied in college is archaic compared with that my boy is now studying. In the social sciences we frequently hear of new ideas and new pieces of social machinery while as a matter of fact, the relative amount of new ideas and things is very small. Some of them seem new until one digs into antiquity. The social sciences have little opportunity for laboratory work or progress by the trial and error method. They deal with human nature and people in groups, hence they are and always will be inexact and subject to the frailties of human nature and the forces of emotion.

The purpose of our Political Science Department is to give the student a picture of Government and Politics that he may understand "what it is all about." To point out a few of what we consider to be the most important factors and problems. To develop in the student the ability to discover the important points and to analyse problems correctly. In order to do this it is necessary for the student to acquire certain facts as a background. For this reason we have for two years been giving a course in Comparative Government. Formerly all we taught here was various phases of American Government. We have also changed the system of outside reading in the first elementary course so as to compel even the elementary student to read analyses and criticisms from various angles.

We have a firm belief that Political Science is essentially a practical subject which should be taught from a practical viewpoint and with a practical background. Generally the professional political scientist, the citizen interested in his government, and the politician are too far apart in understanding and sympathy.

In closing let me state that Mr. Nealley and I are in complete agreement in the above statement. Although I may be the so-called head of the department, we consider the department a cooperative affair and each gives the other complete freedom in his work while agreeing on a few fundamental principles.

E. B. CORNWALL,
Department of Political Science.

Annual Chi Psi Ball Held at the Middlebury Inn

Alpha Mu of Chi Psi held its annual ball at the Middlebury inn Saturday evening, May 21. Fifty couples attended, and music was furnished by Ferd Le Jeune and his orchestra.

The guests from the other fraternities were George Siipola '33, Clarence Lilly '32, Howard Smith '32, Rene Morize '32, Robert Perry '32, George Belfanti '32, William Horr '32, and Edward Yerovitz '33.

Patrons and patronesses were Prof. and Mrs. Ernest C. Bryant, Dr. and Mrs. Stanton S. Eddy, Mr. and Mrs. Benjamin Stewart, Mrs. Charles Swift, and Miss Minnie McDonald.

The Alpha Sigma Phi house was once a station on the Underground Railway, and from a sub-sub-cellar a passageway at one time extended to Otter creek, where fugitive slaves could make their escape to Canada.

Carol McNeely is Elected President of English Club

The English club elected its officers for the coming year at a meeting held Wednesday, May 18. Carol McNeely '33 was elected president. The other officers are Alan Painter '33, vice-president, and Mary Duryee '33, secretary-treasurer.

Miss McNeely is a member of the dramatic club, the French club, and is business manager of the press club. She is feature editor of the CAMPUS, and associate art editor of the 1933 Kaleidoscope, and has served as a member of the frosh frolic and junior prom committees. Besides participating in archery and class basketball and hockey, she is a member of the junior class executive council and of W. A. A. Miss McNeely is affiliated with Alpha Xi Delta.

Painter was assistant manager of freshman football his freshman year and manager this year. He was chairman of his class frosh frolic committee, and is assistant business manager of the Saxonian, and a member of the 1933 Kaleidoscope board. He belongs to the press club, and was on the Dean's list for two years. Painter is Delta Upsilon.

Miss Duryee has been a member of the dramatic and French clubs for three years. She was secretary of her freshman class, and has been on the CAMPUS news staff. Miss Duryee is a member of Pi Beta Phi.

The new members of the club chosen at the meeting are Philip Carpenter '33, Thomas Duffield '33, Lyle Glazier '33, James Judge '33, William Weier '33, Edward Yerovitz '33, Charles DuBois '34, John Isreal Smith '35, Miriam Barber '33, Harriet Douglas '33, Elizabeth Hamlin '33, Dorothy Kennedy '33, Elizabeth Spencer '33, Edith Douglass '34, Mary Hall '34, Clara White '34, and Elizabeth Higgins '35. Further elections will take place next fall.

Sociology Lecture Given Friday by Professor Fife

Professor Harry M. Fife gave a talk on the social and economic factors of international relations in the old chapel room Friday afternoon, May 20. Faculty and students attended.

His topic dealt with the situation in Europe in regard to the payment of war debts, non-cancellation of which has caused great confusion. So closely are reparations and the payments of debts incurred in the Great War linked, that much depends on their final settlement. A possible solution may be found in cancellation of these debts.

Newman Elected New Pi Delta Epsilon President

The Middlebury chapter of Pi Delta Epsilon, national collegiate journalism fraternity, elected officers for the coming year at a meeting held Sunday evening, May 22. Henry L. Newman '33 was elected president, Harthon L. Bill '33, vice-president, Charles N. Dubois '34, secretary, and Clark H. Corliss '33, treasurer.

Newman was business manager of the 1931 freshman handbook, circulation manager of the 1933 Kaleidoscope, chairman of the scullions' ball, and treasurer of junior week this year. He is assistant manager of track, treasurer of the junior class, and a member of Blue Key and Waubanakee. He is Delta Upsilon.

Bill was editor-in-chief of the 1931 handbook and a member of the CAMPUS newstaff. He is manager of varsity football next fall, and has engaged in intramural sports for three years. He is a member of the mountain club and Sigma Phi Epsilon fraternity.

Dubois is editor-in-chief of the 1932 freshman handbook, literary editor of the 1934 Kaleidoscope and assistant business manager of the CAMPUS. He was recently elected to Kappa Phi Kappa, has been on the dean's list for two years, and plays in the college band. He is a member of Kappa Delta Rho fraternity.

Corliss won frosh football nurmerals and varsity letters in that sport and basketball, beside competing in intramural sports for three years. He is captain-elect of basketball, business manager of the 1933 Kaleidoscope and a member of the "M" club, Blue Key, and Waubanakee. He is Delta Kappa Epsilon.

MODERN ATTITUDES THEME OF VESPERS

"A 'Half-baked' Condition is Evident to an Observer," Says Dr. Howard Robbins

The speaker at the vesper service Sunday, May 22, was Dr. Howard Chandler Robbins, former Dean of the Cathedral of Saint John the Divine in New York city. His text was Hosea 7:8 "Ephraim is a cake not turned."

The simile sounds queer to our ears, yet it is easily explained. The cakes of the Israelites were disc shaped, baked on hot stones. In order to be properly done, they had to be turned from one side to the other at exactly the proper time. If not, a cake burned and blackened on one side, and remained doughy and half-baked on the other. Hosea believed that Ephraim, Israel, was "half-baked." Culture, wealth and religion were not well-rounded. The rich were very rich, and the poor were very poor. Religion was over-emphasized one day a week, and neglected on the other six.

Today this same half-baked condition is evident in the single query, "How much is he worth?" It is a common question, yet reveals the innermost workings of the modern mind. We consider money value only, and not the worth of character, brains, and personality. It presents the "doughy" side of our lives.

In our "half-baked" civilization, the burned side is evident in the emphasis placed upon wealth and social position. There is too much contrast between the beautiful homes of the fortunates, and the squalor and disease of the poor. Both sides are ruined because the whole has not been considered. Even the modern attitude toward tariff and international affairs reveals the need for a well-rounded, perfectly baked whole.

This is possible only through the advancement of the Christian church. We should consider the church as a group of individuals, not as an abstract. We must change our standards of values, and recognize true worth as Jesus did. He died that others might live. He gave all and took nothing. We must plan to consider others, to give more than we receive, and thus rid ourselves of the present trend of civilization.

We cannot blame the difficulties of the world on its civilization for that is an abstract conception. We have developed this civilization, and we ourselves must complete it. This is an age of transition, and a change is imminent. The one good result of the World War was to shock people into a realization of the worthlessness of the present mode of living. Today's major problem is not "Shall we change?", but "How shall we change in order to present to the world a well-rounded, fully-developed civilization?"

Hearne to Be President of Wig and Pen Society

Edward W. Hearne '33 was elected president of Wig and Pen society at a meeting held Friday afternoon. Other officers chosen were Mary E. Duryee '33, secretary, and James C. Judge '33, treasurer.

Mr. Hearne has taken part in several plays during the last three years. He also has participated in interclass and intramural sports, and played freshman football. He is a member of the glee club, choir, and band, and is Sigma Phi Epsilon.

Miss Duryee is a member of the production staff at the playhouse, specializing in make-up. She was secretary of her class in her freshman year, and is now a member of the French and English clubs, and of Pi Beta Phi.

Mr. Judge won his numerals in freshman football, and has been on the varsity squad for the last two years. He has had parts in several plays and was president of his class as a freshman. He is a member of Chi Psi.

DEGREE OF DOCTOR OF MEDICINE WAS FORMERLY CONFERRED BY MIDDLEBURY

Those seniors who graduate this June will have either an A. B. or a B. S., but time was when Middlebury conferred the degree of Doctor of Medicine.

In 1810 a committe of one, the standby of the college, Gamaliel Painter, was appointed to prepare a lecture room for the new professor of medicine at Middlebury, who was Dr. Nathan Smith of Dartmouth. Steps were also taken to secure a professor of chemistry. But because the professor "failed to enter upon the discharge of his office of professor of chemistry", he was asked to leave and his office was filled by Dr. Reuben D. Muzzey.

In the meantime a medical school was established at Castleton, the Castleton Medical academy, in 1818. This school petitioned Middlebury College to grant a degree from Middlebury on work done at Castleton. In 1820 this was granted. By giving a speech on the "healing art" the day before commencement at Middlebury and by paying four dollars, a graduate of Castleton received the degree of Doctor of Medicine from Middlebury. When the Castleton school received a charter from the state it changed its name to the Vermont Academy of Medicine, and with power now to grant degrees it severed connections with Middlebury in 1826. However, Middlebury continued to grant honorary degrees of medicine each year.

In the same year that Castleton severed connections with Middlebury, a new school, the Clinical School of Medicine, was founded at Woodstock. Dr. Gallup, the founder, petitioned the legislature for a charter but had no success. So he affiliated with Waterville college, now Colby. Opposition in the state grew. People did not appreciate a college with degrees from another state. So Dr. Gallup petitioned Middlebury to grant degrees from his school. And the corporation agreed, provided one had a "fair" moral character, three years' study of medicine, attendance on two courses of lectures, and passed an examination. The arrangements were exactly those declared to be illegal in 1823 in the case of Castleton.

In 1835 the state granted a charter to the school at Woodstock and connections were severed with Middlebury. The Woodstock institution closed in 1856, the Castleton academy in 1861. But with the exception of pre-medic courses, Middlebury's connection with the medical profession was over in 1835.

(Information from New England Journal of Medicines, Vol 206, No. 14, April 7, 1932.) c.m.

SOCIOLOGY SEEN AS A MODERN SCIENCE

(Continued from page 4)

out making them weaklings. There also arises the problem of how to allow the government to control certain activities without creating a governmental autocracy and despotism.

Few people realize that for every advancement in science, industry, transportation, and population there must be a readjustment in social organization to meet these problems which involve new relationships among men. The society which gave man property rights from the center of the earth to the stars of heaven under and above a certain piece of property must be readjusted when metals are found below his house and airplane paths extend over his domicile. A man who lives as he pleases in a rural community must readjust socially when a city grows about him. A family unit which was quite an independent industrial unit a century ago now finds its industrial functions gone. Its independence is gone also because the craftsman was compelled to go to the factory and his children must now become wage earners. The family changed greatly when it lost its industrial functions and independence. The large family was once economically advisable but now prohibitive. There has been retarded marriages due to the rising educational standards for young people before marriage. The movies, the bridge parties, the women's clubs, birth control, and the lowering standards of sex ethics have modified the family relations until the domestic problems have become prominent in social engineering.

Many of our newspapers are owned by chain companies. They are greatly influenced by the demands of the advertisers or by the papers' political supporters. Thus a great source of our information comes from prejudiced and partial sources. The independent newspaper is rare. The radio is influenced by the advertisers so that little if any of the programs are neutral. Great lobbies influence our legislation. Thus it is almost impossible to get an efficient and unprejudiced public officer. Sociology regards the production of an impartial public officer absolutely essential.

Sociology seeks the ideals of democracy with full realization and knowledge of the present ignorance and prejudices of the masses. It seeks leaders in politics who will devote themselves to the service of the country, it seeks lawyers who will support the law and not prevent it; it seeks the new home with all the good facilities but fully adjusted to new conditions.

This country was for over a century a country of small communities of small social groups. The primitive or primary social groups enlarged into large business groups, large city groups, large state groups, and a great national group. These groups have grown so rapidly that the proper social ideals, controls, and practices have not become established. Our government has been notoriously corrupt, our business has exploited our people, our statesmen have been inferior and too often they have several selfish interests; our homes and our churches are shattered and in despair. The great need is social analysis of our great social problems.

The very fact that we have a quarter million of our citizens in prison and as many more criminals whom we are unable to send to prison, the fact that although we spend a billion dollars yearly in educating our young yet the cost of delinquents in many of our states is more than that of education and religion combined; the fact that because of crime and fraud our country loses six billions of dollars yearly; the fact that seven millions of our people are unemployed while we have all the raw material a nation could wish — these are the facts that challenges the best minds in business, politics, education, and religion to a study of better social ideals, technique and action.

Sociology has no propoganda, it simply analyzes conditions and asks for intelligent analysis. It seeks to eliminate inefficiency, predjudice, and ignorance. The function of sociology is to trace the social evolution of man, to follow him through his earlier stages of developement; to collect the great social principles; to eliminate those characteristics of society which hinder its progress; to help in forming a new social technique which is not based solely upon trial and error but upon science and reason. Since over ninety percent of man's activities are social thus the science of sociology becomes most important when the advancement of man is considered.

DKE DEFEATS DU 8-7 IN BASEBALL FINALS

Dekes Clinch Intramural Championship by Small Margin in Hard Contest

Delta Kappa Epsilon defeated Delta Upsilon in the finals of the intra-mural baseball championship last Thursday at Porter field by the score of 8-7.

The game was a very well played contest throughout, only two errors being made. Markowski and Bakeman both pitched a good game for their respective teams. Turner, D. U., playing in left field carried off the hitting honors of the day with three out of four.

The D. U.'s took the lead in the first inning, but the Dekes succeeded in tying it up in the second. The D. U.s again forged ahead in the fourth with a three run scoring spree. The Dekes came back strong in their half of the sixth with a six run rally which enabled them to win by a margin of one run, as both teams were held scoreless in the last inning.

Netmen Beat R. P. I. at Troy While Tufts is Winner Here

The Middlebury tennis team won one and lost one during the past week, downing R. P. I. 5-4 but losing to Tufts 6-0.

In the Tufts match which was played on the Hepburn courts, the team looked stale. It seemed as if they had been playing too much tennis. Flagg and Sloper were both beaten in three sets the final being deuced in both matches. Robart was only downed after two hard fought sets.

The summaries: Howard (T) defeated Flagg (M) 7-5, 4-6, 7-5; Monier (T) defeated Sloper (M) 6-1, 6-8, 12-10; Walker (T) defeated Robart (M) 11-9, 10-8; Wilson (T) defeated Volkmar (M) 6-1, 6-4. Doubles: Howard and Walker (T) defeated Flagg and Sloper (M) 6-0, 6-3; Monier and Wilson (T) defeated Loomis and Volkmar (M) 6-1, 6-4.

Middlebury 5 — R. P. I. 4

In the R. P. I. match which was played at Troy, the team edged out their rivals in a close encounter taking four singles and one doubles match. Flagg, Allen, Robart, and Volkmar turned in the singles victories without dropping a set, while Flagg and Allen combined to win their doubles in straight sets.

The summaries: Flagg (M) defeated Thompson (R) 6-1, 8-6; Root (R) defeated Sloper (M) 6-3, 7-5; Allen (M) defeated Daniels (R) 6-4, 6-2; Robart (M) defeated Wetzel (R) 6-0, 6-4; Volkmar (M) defeated Donovan (R) 6-1, 6-1; Hagenbuch (R) defeated Loomis (M) 6-1, 6-2. Doubles: Flagg and Allen (M) defeated Thompson and Wetzel (R) 6-4, 6-2; Root and Hagenbuch (R) defeated Sloper and Robart (M) 6-4, 5-7, 6-3; Connelly and Daniels (R) defeated Volkmar and Loomis (M) 6-2, 6-4.

PANTHERS FAVORED TO TAKE ANNUAL GREEN MOUNTAIN CONFERENCE MEET

(Continued from page 1)

220 down to 23.2. Stalker copped the high hurdles, a second in the 220 yard hurdles, and won the broad jump.

U. V. M. has broken even in four meets, defeating the Montreal A. A. A., and St. Lawrence, but losing to Colby, and R. P. I. The Canadians offered little resistance to the Green and Gold and the victory meant little. Middlebury also overcame this team by a large score, but the men from across the border were not in condition, so little could be gained by comparison.

Vermont defeated St. Lawrence by a score of 87½-47¼. This was a much larger margin than was expected, and boosted their stock considerably. Meehan equaled the Vt. record in the 100 yd. dash, covering the distance in 10.2 seconds. He also copped the pole vault, and a second in the broad jump. Delfausse led the parade in the 220, and 440, but as he was not pressed the times in these events were not exceptional. In the furlong he won with plenty to spare, but found himself "boxed" in the quarter, and had to finish strong to win. The Middlebury sprinters will find no little trouble in stopping this athlete.

Colby swamped the Catamounts in their next meet 98½-36½. The U. V. M. found little to cheer about in this defeat, being thoroughly outclassed in all events but the 220, 440, and two mile run. Delfausse was again the leading light for the Green and Gold, capturing the longer dash in the time of 23.2 seconds, and placing second in a fast quarter. U. V. M. took all places in the two mile event, Hadley, Harwood, and Wilder finishing in that order.

In their last start against R. P. I. Vermont lost to the Engineers 82½-43½. Thus in their last two meets the Catamounts have not fared so well, and will be out to redeem a rather indifferent season by a commendable showing at the conference meet.

Middlebury has enjoyed a very successful year on the other hand, and a victory at Burlington will cap a brilliant record. The only meet lost was to Williams. By virtue of an almost clean sweep in the field events, the Purple gained a margin over the Panthers, that the latter could not overcome, and staved off the Blue 74-61. Lovell set up a new record in the javelin, hurling the spear 169 feet 4½ inches. Other oustanding performers were Fallon in the 220, and 440; MacLean in the hurdles, and Brown in the dash, and broad jump.

Middlebury had little trouble with the pooly conditioned Montreal A. A A., and won 88-47. The Panthers showed strength in the track events that the Canadians could not overcome. Brown, and MacLean again led the team in scoring, with eighteen and fifteen points respectively.

In only the quarter, mile and two mile did the visitors give Middlebury a serious argument, but a splendid burst of speed by Sears in the last hundred yards gave the Panthers the edge in the long distance event.

Middlebury next met Boston university, and enjoyed a field day at the Terriers expense, winning 101-34 The Blue captured eleven firsts and made a clean sweep in five events to walk off with the meet. There is little to relate concerning this meet but a Middlebury parade.

At the intercollegiates the Panthers were handicapped by the absence of the freshmen who were ineligible, but made a nice showing to capture third place. Fallon placed second in the 440, and 880; MacLean won the high hurdles, and he got a second in the low hurdles, and Brown leaped to first place in the broad jump.

In their final start before the Conference meet, the Panthers took over Union, 75-51. The feature of the meet was the 4.34 mile turned in by Harwood. After trying the two mile, and the half the former cross couuntry captain seems to have found himself in the mile. Sears again electrified the onlookers with a marvelous sprint at the end of the two mile event, which carried him to an easy victory. This meet afforded an excellent opportunity for a final brushing up prior to the state competition.

Predictions are difficult and tricky even when advanced by an expert, but when offered by one who is no authority on the subject their value is open to question. However nearby on this page is a form sheet of how they may finish, compiled solely on the basis of past performances. In some cases the competitors are extremely closely matched, and picking the winner is a toss-up. Again certain athletes are only as good as they have to be, and so times mean nothing in such cases. Furthermore condition has much to do with a man's performance. However the men selected for the most part are apt to run true to form, and an idea of the relative strength can be determined.

Rowley of Norwich looks to have the edge in the 100 yd. dash, based solely on his two ten second performances. Brown of Middlebury has been more consistent than Meehan of Vermont, so is favored for second place, in spite of the fact that the latter has covered the distance in 10.2. Delfausse and Rowley should put up a nice race in the 220, but if the latter is hard pressed in the century, he may not be able to hold off the Green and Gold flash. Prohazka will give both plenty of competition, and it would not be a great surprise if he should break the tape ahead of one or the other.

Fallon, and Delfausse are apt to have a merry party in the quarter mile, and picking the winner is extremely difficult. As a result of his showing at the intercollegiates in Worcester, we like Fallon, but that is a matter that can be settled only by the race. Boehm should edge his way into third place. The half mile will also prove a corker, and again Fallon is the Midd mainstay with Hunter to help. Brooks of Vermont will be the chief man to watch in this event, and if Fallon does not enter the half or if the quarter takes too much out of him, Brooks will be the favorite.

If Harwood can repeat the mile in 4.34 he should take the event hands down. Brooks of U. V. M. will be his chief rival in this event, but Short and Hunter should make things interesting for any of the entrants. To pick anyone but Sears in the two mile race would be foolhardy, for no matter how good the opposition, the diminutive Blue athlete has always left the field behind in the last half lap. He is just as good as he has to be, and he will have to be pretty good Monday to beat Harwood and Hadley of U. V. M.

In the high hurdles MacLean has the edge with his team-mate Roberts picked for second. Proctor of Vermont stands a chance of beating out Roberts, but the Midd athlete rates as the favorite. Hurley of Norwich also has a fine chance of upsetting the dope in this event, so that the low barriers should prove interesting. In the 220 yd. hurdles MacLean is slightly the favorite with Proctor, Roberts, and Stalker of Norwich all serious threats.

Again in the pole vault it is a toss-up, with Meehan of Vermont, and Collins the likely candidates for first place. Meehan has the more consistent record so should get the win, but a Blue victory would not be classed as an upset.

The high jump should find Adams of U. V. M. leading the field, with Brown a close second. The Green and Gold is also likely to garner a third place with Millet the jumper. Brown should add to the Panther's total with a first in the broad jump, but Tupper of Vermont, and Stalker of Norwich are favored to take the other two positions.

In the weight events Norwich has a big advantage, thanks to the ability of McGuire. His throw of 134 ft. in the hammer makes him an odds on favorite, as his state rivals cannot even come close to that figure. Cronin, his teammate, will probably be runner-up, while Watson may garner third for Midd. If he can repeat his heave of 122 ft. he should also cop the discus, and again a Cadet, this time Lemaire, is favored for second. Brown may possibly beat out Lemaire. If the Norwich weight star hopes to be a triple winner he will have to be at his best in the shot for Brown will crowd him hard. However he will probably prove capable of taking this event also.

Middlebury is in line for a first and second in the javelin, with Lovell, and Erkkila placing in that order. Lang of Norwich, and Gardiner of Vermont are apt to displace Erkkila, but the Blue athlete has the edge to date.

Students sleeping in the library at Washington university were rudely awakened by a speech made by a "red" agitator on the campus.

HOW THEY MAY FINISH

HOW THEY MAY FINISH

Totals: ----- Middlebury 71; Vermont 33; Norwich 31.

Tennis Team to Play Two State Matches This Week

The Middlebury tennis team will conclude its season this week with two state series games, meeting U. V. M. Monday, and St. Michael's Friday.

The Blue and White netmen hope to extend the win streak begun at Troy, by taking both of these matches. They will be especially anxious to avenge the defeat suffered at the hands of Vermont, while hoping to making it two straight over St. Michael's.

U. V. M. tied with Tufts 3-3, after the Jumboes had defeated Middlebury 6-0. This would tend to strengthen the belief that the Green and Gold courtmen were a little stronger than the Panthers, but against Tufts and Vermont the Blue courtmen did not seem up to form.

The Green and Gold will again start Wilson No. 1, Tupper No. 2, Meyers No. 3, and Mulcahy No. 4. Wilson and Tupper will pair in the doubles, with Meyers and Woodward making up the other team. Flagg, Allen, Robart, Volkmar, and Loomis will comprise the Middlebury team.

St. Michael's has been rather inactive since the last match with the Panthers. The Purple defeated the N. Y. State Teachers' college 4-3, with Kennedy and Meade leading the attack. Maynes, Ruggiero, and Meade won their singles matches, while DuPont and Kennedy teamed up to win the doubles. This was the first time the latter had participated for St. Michael's, but he played a brilliant game, and will probably play in the singles against Midd. Another man who showed up well against the future teachers was Meade. He is apt to play No. 1 or No. 2 next Tuesday.

Middlebury's Golf Team Holds Union to a 3-3 Tie

Middlebury's newly formed golf team ended its first intercollegiate match with a 3-3 tie with Union college at the Mohawk country club in Schenectady, N. Y., Friday afternoon.

Captain D. Riccio, playing number one man, easily defeated Captain Steward 6 and 4. V. Riccio and Hummer, in their contest, were even to the sixteenth hole, but Riccio took the seventeenth on a par and halved the last to win 1 up. In the four ball match for these men, the play had to go twenty-two holes for a decision, Middlebury winning on D. Riccio's birdie three.

Pickens, Middlebury's number three man, was defeated by Burley in a close encounter, the count being 2 and 1. Eaton lost to Piowtosky 4 and 3. The fourball scoring gave a win to Union 2 and 1.

Due to the absence of Nelson and Sorensen only four men made the trip, although it was originally planned to play with six men teams. It is felt that a match between the larger teams would have given a greater advantage to Middlebury.

SENIORS !

THE WEATHERVANE

Opening May 27, Announces New Low Prices for 1932:

Lodging $1.00-$1.25; Breakfast 40c-75c; Luncheon 50c-75c; Dinner 75c-$1.00; Special Sunday Supper 65c.

In the best families (or any others for the matter) that doesn't happen nowadays. Hence the United States Air Corps offers some attractive inducements to you college students for whom it has built a $10,000,000 institution at San Antonio, Texas, where they teach you to fly and while you are learning:

Pay you a salary of $75.00 per month. Pay your living expenses.

Supply you (free, of course) with snappy, tailor-made, sky blue uniforms.

Grant you the social and military privileges of potential officers.

Pay your traveling expenses from your home to the new field at San Antonio. 700 Men are taken in each year. The course requires a year to complete and includes over 200 hours of solo flying. Those who stay the full year are commissioned as Lieutenants in the Air Corps Reserve.

If you don't like the training you may resign at any time. For Example: Should you stay three months and then resign you will received $225.00 cash, your round trip expenses from your home to San Antonio, and about 50 hours of solo flying.

The service and associations of the Air Corps gives its members a very real distinction and a very noticeable breadth and poise.

If you have applied and are ready to go, we have compiled information and tips giving you inside angles and dope that will be invaluable when you arrive at the field. If you haven't applied yet then by all means get our information. We tell you the entrance procedure and certain twists that make your getting in easier and quicker. The information written by men who have been thru the school covers all points from beginning to end that you are interested in knowing. This information cannot be obtained elsewhere; it is complete. Nothing else to buy. The price is $1.00 or sent C. O. D. if you desire.

BLUE NINE SWAMPS CATAMOUNTS 22-3

Panthers Take Over Brown 2-0 But Lose to B. C. 5-4 and to Northeastern 9-1

Middlebury 2 — Brown 0

Playing smart, heads up baseball behind the steady pitching of Stefaniak, the Panthers defeated Brown 2-0 at Providence last Wednesday.

In spite of the fact that Middlebury garnered only one hit, they undoubtedly deserved to win. Yeoman's single in the fourth produced the winning run, after Makela had reached first on a fielder's choice and was advanced by a base on balls to Nelson, and a passed ball.

StSefaniak twirled beautiful ball in scoring his third win of the season, and his second shut-out, allowing the Bruins only four scattered hits. Inning after inning he blanked the opposition, and while his teammates committed two errors, he was always able to bear down at the critical moments.

The final Blue tally came in the ninth. Nelson was given a life on an error by the Brown third sacker, but Yeomans flied out. Another error on Hartrey's grounder put the Panther first baseman in position to score on Dumas' sacrifice bunt. Dumas was batting for Bakey, who played his first game for the Blue and White.

Gilbane batted for Halpin in the eighth.

Boston College 5 — Middlebury 4

After their splendid victory over Brown, Middlebury further added to its prestige by carrying a strong B. C. team ten innings before losing 5-4, Thursday, May 19.

This defeat was very bitter to accept, for after playing the highly touted Heights nine to a standstill for nine innings, and gaining a lead in the tenth, the Panthers watched their lead melt away on a home run by Chesnulevitch. and saw the game slip from their grasp on a barrage of Maroon and Gold bingles.

Barker hurled a nice game against the free swinging Eagles, but was the victim of poor support, although the winners did take friendly to his offerings in the last frame.

Middlebury registered a pair of tallies in the first inning without the aid of a hit. Olson reached first on an error. Sorensen was passed, and a wild pitch advanced both one base. Stefaniak sacrificed the first run across, and the second came across the plate on a fly by Makela to the outfield. The Boston nine evened matters in the second on three hits and a base on balls. Both teams pushed a run across in the third, but neither could score again until the last inning. Middlebury put over a run in the final frame on hits by Olson, and Stefaniak, with an error in between. B. C. went on to win in their half of the inning, on a homer by Chesnulevitch, followed by two singles and a double.

Delta Kappa Epsilon Wins Intramural Track Meet

DKE had little trouble in winning the intramural track tournament last week, scoring in every event but the 100 yard dash.

MacKenzie was the leading scorer, garnering 10½ of his team's 17¼ points, by virtue of first in the broad jump, and shot put plus a tie for third in the high jump. CP was runner-up to the Dekes with 12 points, while SPE was third with 8½ credits, just one-half a point more than KDR accumulated.

Summary:

100 yard dash: Wintersteen, CP; Cady, BK; Mathewson, KDR.

120 yard low hurdles: Banta, SPE; Willoughby, SPE; Wyder, DKE.

220 yard dash relay: DKE, KDR, BK.

Board jump: MacKenzie, DKE; Jocelyn, CP; Wyder, DKE.

High jump: Munford, CP, and Pritchard, KDR, tie for first; MacKenzie, DKE, and Willoughby, SPE, tie for third.

Shot put: MacKenzie, DKE; Riccio, BK; Bakeman, DU.

Totals: DKE, 17½; CP, 12; SPE, 8½; KDR, 8.

Northeastern 9 — Middlebury 1

In a game that was expected to be the easiest of the three, the Panthers played a ragged game and were defeated 9-1, Saturday.

Showing a complete reversal of form, behind pitching that was none too effective Middlebury was never in the game after the early innings. The Bay Staters got a run in the initial frame, another in the third and after the Panthers had got one back in the fifth. the Huskies scored five times to put the game on ice.

Anderson was driven from the box, and Olson attempted to stem the tide, but he too late gave way to Bona. Coach Hessler then sent in substitutes freely as there was little chance of winning.

Olson led the Panthers at bat with two hits in three trips to the plate, while Anderson got two in two during the time he was in the game, and scored the only run for Middlebury.

MIDDLEBURY PLAYS HORSEMEN MONDAY

Panthers Will Also Oppose St. Michaels at Porter Field Saturday, June 11

Middlebury will conclude the 1932 season with two more games, Norwich at Northfield Monday, and St. Michaels on Porter field June 11.

In the first encounter between Midd and Norwich, the Blue stepped out from under the Horsemens' one run lead in the fifth, going on a rampage which ended with the final score at 7-3 in favor of Middlebury. Barker's fine pitching performance overshadowed that of Stufflebeam, the Middlebury freshman edging the Cadet twirler by four strike-outs.

The Horsemen played errorless baseball when they defeated St. Mike's 5-3. This match is believed to be the first errorless contest ever played on the Norwich diamond. Stufflebeam was in top form, adding eight assists to his credit, besides pitching a good game. The team preserved its reputation for hard hitting, collecting two triples and three doubles.

Norwich has defeated Vermont 12-2, as compared to Middlebury's 2-0 victory over the Cats, but judging from the last game, it seems that the Blue should experience little difficulty in taking the Soldiers into camp again Monday.

The final game of the season on June 11 will bring St. Michaels to Porter field with Coach Carr's men out to avenge the first defeat suffered at the hands of the Panthers.

After the game with Middlebury, the Winooski nine lost to St. Lawrence 5-1 in a contest cut short by rain. They followed this with a 3-2 victory over the hard hitting Norwich club. Meade, starting his first big game for the Purple, let the slugging cadets down with five hits. Colville shut out U. V. M. 4-0, showing the type of ball St. Michaels was playing. With two victories and one defeat recorded against them in Conference competition, Coach Carr's men were forced to bow to Norwich in a return engagement, losing 5-2.

Against Ithaca last Friday St. Michaels lost by an 8-5 score. The team played good ball, but it just wasn't their day. Hannon, who leads the league in batting, and Tivnan were the leading stickers for the losers.

Panther Trackmen Defeat Union With Score of 75-51

The Middlebury College track team scored its third consecutive dual meet triumph at Schenectady last Saturday when it easily overcame the Union trackmen 75-51.

As usual, Brown and MacLean led in point gathering, the former getting sixteen and MacLean thirteen. Of the nine Middlebury first places Brown captured three and MacLean two.

In the mile run Harwood surprised by turning in the fastest Blue and White performance of the year, although it was his first scoring effort in the event. He won from Short by about ten yards in 4:34.6. The two mile saw Sears run his fastest effort of the season, a sound 10:01.4.
opposition.

Fallon, taking the lead at the crack of the pistol, ran the quarter in 51.8. In the sprints Brown and Prochazka turned in their best times of the season, Brown digging down the hundred yard stretch in 10.2, and Prochazka taking the 220 in 22.8.

The summaries:

100 yard dash: won by Brown, M; Prochazka, M, second; Cady, M, third. Time 10.2.

220 yard dash: won by Prochazka, M; second, Montgomery, M; Chalmers, M, third. Time 22.8.

440 yard run: won by Fallon, M; Hill, U, second; Forbes, U, third. Time: 51.8.

880 yard run: won by Sleight, U; Holleran, U, second; Childs, U, third. Time: 2:03.8.

Mile run: won by Harwood, M; Short, M, second; Hunter, M, third. Time: 4:34.6.

Two mile run: won by Sears, M; Kazmierczak, U, second; Daw, U, third. Time: 10:01.4.

120 yard high hurdles: won by Cohn, U; second, MacLean, M; Roberts, M, third. Time: 15.8.

220 yard low hurdles: won by MacLean, M; Cohn, U, second; Roberts, M, third. Time: .26.

Shotput: won by Brown, M;Hoffman, U, second; Riccio, M, third. Distance: 38 ft. 11 in.

High jump: won by Savage, U; Turner, Cohn, U, tied for second. Height: 5 ft. 8 in.

Pole vault: Collins, M, and Reeder, U, tied for first; Schoonmaker, M, third. Height: 10 ft. 6 in.

Javelin: won by L. Lovell, M; Parker, U, second; Erkkila, M, third. Distance: 166 ft. 1 in.

Discus throw: won by MacLean, M; Gulmac, U, second; Brown, M, third. Distance: 110 ft. 3 in.

Broad jump: won by Brown, M; Mirate, U, second; Cohn, U, third. Distance: 20 ft. 6 in.

Middlebury 22 — Vermont 3

Middlebury won its fourth consecutive state series game, and at the same time administered a bitter defeat to its old rivals, U. V. M., burying them under a 22-3 avalanche yesterday.

Led by Zawistoski the Panthers crashed out twenty-three hits for twenty-two runs. Every man took an active part in the slugfest. Stefaniak increased his perfect win record to four games.

The Catamounts stepped off to an early lead, scoring a run in the first inning on singles by Jay, McKay and an error by Sorensen. This lead was maintained until the third when the Blue and White broke loose with a five run assault, after two were out.

The Green and Gold got one run back in their half of the same inning, on two hits and an error. Middlebury launched another offensive in the fifth where Zawistoski's double climaxed a rally consisting of two hits, a sacrifice, and an error. The winners netted six more runs in the following frame to put the game on ice.

Coach Gardiner put new pitchers into the fray every other inning in a wild attempt to halt the Panther parade, but all hurlers looked alike yesterday. Six more runs in the seventh only added to the Vermont agony. Stefaniak tripled after four singles had rattled from Blue bats, to cap the rally. Meanwhile the U. V. M. bats were silenced by the effective work of the Panther speed ball ace.

Middlebury Golfers to Meet Norwich Saturday

The Middlebury golf team will play its second match of the season when it opposes Norwich at the Middlebury country club Saturday morning.

Manager D. Riccio states that he has had no indication of the strength of the Maroon golfers but it is known that they have practiced intensively indoors during the winter under the direction of professionals. It has not been possible to obtain reports of their matches so that no prophecy can be made.

The Union meet showed the Riccio brothers to be playing well and it is felt that Norwich will find them hard to beat. Nelson will play as Middlebury's number three man if his baseball activities do not interfere. His performance in the individual tournament showed him to be a strong golfer. The remaining men to compose the five man team will be chosen from Chalmers, Eaton, Lombardy, Pickens, and Sorensen, all of whom finished among the leaders in the spring golf contest.

Bring in your shoes and let us repair them for you. We can save your shoes and money. We use the best and our prices are the lowest in town. Why pay more. We can save you 25c to 30c on every pair of shoes. All work guaranteed.

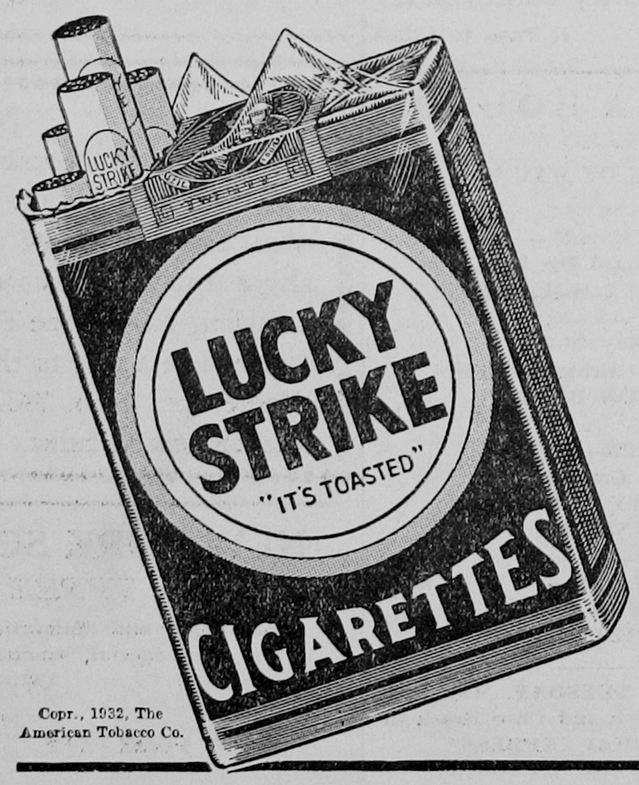
DO YOU INHALE?

A frank discussion at last on a subject that has long been "taboo"



"LET sleeping dogs lie!" So said the cigarette trade when first we raised the subject of inhaling. But dodging an important issue is not Lucky Strike's policy!

Do you inhale? That question is vitally important . . . for *every smoker* inhales—knowingly or unknowingly. Every smoker breathes in some part of the smoke he or she draws out of a cigarette! And the delicate membranes of your throat demand that your smoke be pure, clean—free of certain impurities!

No wonder Lucky Strike dares to raise this vital question! For Luckies bring you the protection you want . . . because Luckies' famous purifying process removes certain impurities concealed in every tobacco leaf. Luckies created that process. Only Luckies have it!

So, whether you inhale knowingly or unknowingly, safeguard those delicate membranes!

"It's toasted"
Your Throat Protection—against irritation—against cough
